CHOOSE THE STYLE THAT ADDS THE MOST *Beauty* TO YOUR HOME

Qualifications

All of CWD's vinyl frame windows come with heavy-duty, aluminum reinforced vinyl with multi-chambers for superior strength, durability, and energy efficiency. The frame depth is 3 1/4" with 7/8" insulated glass. See our [Product Offering sheet](#) for more ratings and configurations.

Series 8100 (Single Hung & Twin)

Our 8100 Twin is two windows within one continuous head and sill frame.

The benefits of installing this window are many, including:

- Less time to install (*installing 1 window instead of 2 and a mull bar*)
- Less chance of water intrusion at the mull bar application
- Fewer windows to unload or transport to job sites
- Less complicated installation
- Less chance of failed inspection with factory mull

8100 & 8200 Self Locking Dual Action Sash Locks

Series 8150 and 8300 (Picture Window & Architectural)

- The 8150 frame has approximately 1 1/4" less visible glass area than the 8300 frame.
- The flange profile on the 8150 has a 1/2" lower beveled architectural protrusion on the face of the flange than the 8300 frame.
- The 8150 frame uses a snap in sash stop to cover the installation holes in the sash track.
- The 8300 frame uses snap in hole plugs to cover the installation screw holes.
- The 8150 frame matches the 8100 SH and 8200 HR.
- The 8300 frame resembles the 8400 CS and 8450 AW from the exterior.
